FREIGHT ANALYSIS REPORT

Last Mile Carrier Review & Cost Optimisation Findings

ANALYSIS PERIOD	CONSIGNMENTS REVIEWED	TOTAL FREIGHT SPEND	DELIVERED
Jan – Mar 2025 (Q1)	1,260 shipments	\$25,350 AUD	May 2025

OVERVIEW

Executive Summary

Q1 2025 · 1,260 consignments across 3 active carriers · \$25,350 total freight spend

IDENTIFIED SAVINGS

\$16,680

Annualised estimate across 4 priority actions. High-priority items achievable within 60 days.

AVG COST / CONSIGNMENT

\$20.12

vs FreightGauge benchmark of \$16.82 for comparable AU ecomm accounts

DIM BILLING RATE

71%

71% billed on dimensional weight. FG benchmark: 48%.

Carrier concentration risk

AusPost carries 60% of volume at \$21.34 average — 22% above Couriers Please for comparable metro/suburban routes. Shifting 200 consignments per quarter to CP yields an estimated \$680 per year at current rates — low effort, implement via routing rule update.

DIM billing significantly above benchmark

71% of consignments are billed on dimensional weight. This indicates packaging is oversized for product weight. Standardising to 2–3 box sizes could reduce the DIM rate to ~50%, saving an estimated \$4,800 per year in avoided DIM surcharges.

Free shipping threshold too low

Free shipping triggers at \$75. At your current average order value of \$94, approximately 58% of orders qualify. Moving the threshold to \$95 would reduce free-shipping volume by ~28%, saving an estimated \$8,400 per year with minimal conversion impact.

Metro density opportunity

34% of orders ship within 15km of your Alexandria warehouse. Uber Direct or similar gig-economy carriers offer same/next-day delivery at \$6.50–\$9.00 per consignment versus \$18–22 via AusPost metro — estimated \$2,800 per year at current metro volume.

SECTION 1

Carrier Performance

Current carrier mix, spend distribution, and average rates for Q1 2025

CARRIER	CONSIGNMENTS	SHARE	TOTAL SPEND	AVG / CON.	VOLUME
AUSPOST	760	60.3%	\$16,215	\$21.34	60%
COURIERS PLEASE	420	33.3%	\$7,537	\$17.94	33%
ARAMEX	80	6.3%	\$1,598	\$19.98	6%
Total	1,260	100%	\$25,350	\$20.12	

Carrier Alternatives — FreightGauge Assessment

- Worth Evaluating

Uber Direct — 34% of your orders ship within 15km of your Alexandria warehouse. Uber Direct rates of \$6.50–\$9.00 for metro routes represent a 55–70% saving versus AusPost metro. Same-day SLA suits your fashion-conscious customer base.
- Worth Evaluating

StarTrack — For high-value orders (\$180+), StarTrack's premium tracking and guaranteed next-day metro delivery reduces customer service contacts and returns-related freight. ~120 orders/quarter in this value band.
- Not Recommended

TNT / FedEx Express — Express network rates of \$25–40+ per parcel are uncompetitive for sub-2kg apparel without a negotiated rate card. Not suitable at current volume without contract pricing.

SECTION 2

Cost Breakdown

Charge-type analysis across carriers — Q1 2025. All figures AUD inc. GST.

AusPost — 760 consignments · \$16,215 total

CHARGE TYPE	CONS.	TOTAL	AVG / CON.	% OF CARRIER
Base freight rate	760	\$12,460	\$16.39	76.8%
DIM weight surcharge	490	\$2,180	\$4.45	13.4%
Residential delivery surcharge	620	\$930	\$1.50	5.7%
Fuel levy	760	\$645	\$0.85	4.0%
AusPost subtotal	760	\$16,215	\$21.34	100%

Couriers Please — 420 consignments · \$7,537 total

CHARGE TYPE	CONS.	TOTAL	AVG / CON.	% OF CARRIER
Base freight rate	420	\$6,090	\$14.50	80.8%
DIM weight surcharge	210	\$840	\$4.00	11.1%
Fuel levy	420	\$607	\$1.45	8.1%
Couriers Please subtotal	420	\$7,537	\$17.94	100%

Total freight spend (all carriers)	1,260	\$25,350	\$20.12	—
------------------------------------	-------	----------	---------	---

SECTION 3

DIM Billing & Anomalies

Dimensional weight billing analysis and billing discrepancies identified in Q1 2025

DIM Weight Billing		Billing Anomalies Detected	
Consignments billed on DIM weight	71% (895)	Consignments with anomalies	38 flagged
FreightGauge benchmark	48%	Duplicate billing events	4
Excess DIM billing (vs benchmark)	+23 pts	Weight class mismatches	22
Estimated quarterly overcharge	~\$1,200	Surcharge applied incorrectly	12
Dominant DIM factor	AusPost 250cm3/g	Total recoverable (est.)	\$340-\$480

Root cause: packaging standardisation

Your current packaging uses 6 different box sizes ranging from 200x150x100mm to 450x350x250mm. The 3 largest sizes account for 68% of DIM-billed consignments. A rationalisation to 2–3 sizes fitted to your top-selling SKU dimensions would reduce DIM exposure materially.

Free shipping threshold

At \$75, your free shipping threshold qualifies 58% of orders (Q1 average order value: \$94). The freight cost absorbed on free-shipping orders was \$8,220 for the quarter — 32% of total freight spend. Moving to \$95 reduces qualifying orders to approximately 42%, saving an estimated \$2,100 per quarter.

SECTION 4

Recommendations

Prioritised actions — estimated annualised impact based on Q1 run-rate

HIGH	Raise free shipping threshold to \$95 Reduce freight subsidy on low-AOV orders	\$8,400 EST. ANNUAL SAVING
Your current threshold of \$75 captures 58% of orders at a freight cost of \$8,220/quarter. Raising to \$95 reduces this to ~42% with minimal conversion loss at your AOV profile. -> Update Shopify free shipping rule from \$75 to \$95 -> Update website banners and checkout copy -> Monitor conversion rate weekly for 4 weeks post-change		
HIGH	Standardise packaging to 3 box sizes Reduce DIM billing rate from 71% toward 48% benchmark	\$4,800 EST. ANNUAL SAVING
Six active box sizes, three of which are significantly oversized for your top 20 SKUs. Rationalising to 3 sizes mapped to actual product dimensions is a one-time operational change with ongoing freight saving. -> Audit top 20 SKUs against current box assignments -> Identify optimal 3-box config (recommend 200x150x80 / 300x220x120 / 380x280x160) -> Order new packaging run — 6–8 week lead time -> Brief pick-pack team on updated box selection rules		
MEDIUM	Trial Uber Direct for metro consignments 34% of orders within 15km of Alexandria warehouse	\$2,800 EST. ANNUAL SAVING
At \$6.50–\$9.00 per consignment versus \$18–22 via AusPost metro, Uber Direct offers a compelling cost case for short-distance orders. Same-day delivery is a customer experience upgrade. -> Apply for Uber Direct business account (2–3 day onboarding) -> Define metro zone trigger in Shopify shipping rules (15km radius) -> Run 50 con/week pilot for 4 weeks — track cost, SLA, and customer feedback		
LOW	Rebalance AusPost / Couriers Please split Shift 200 suburban cons/quarter from AusPost to CP	\$680 EST. ANNUAL SAVING
Couriers Please covers comparable metro/suburban zones at \$17.94 average vs AusPost \$21.34. Updating routing rules is low-effort with immediate per-shipment saving. -> Identify AusPost suburban routes also covered by CP -> Update shipping platform routing rules to prefer CP for matched zones		

APPENDIX

Consignment Data Sample

Representative sample of 20 consignments from Q1 dataset. Full dataset available on request.
